Ideation Phase Brainstorming

Date	28 April 2023
Team ID	NM2023TMID15077
Project Name	Traffic Intelligence: Advanced Traffic Volume Estimation with Machine Learning

Defining problem statements and prioritizing ideas based on project.
Traffic problem is one of the major problem now a days, In the increase in no of vehicles and non –usage of public transport leading to traffic related issues, Making a eye on count of traffic at each level enables the government to take the further decisions such as building new roads, increasing infrastructure ,developing mutli-channel connectivity .To address such problems to tracking the vehicle count in each and every place AI-ML has given a solution to such kind of traffic related issues, which are able to measure the volume of traffic, identify the violations of traffic rules etc.
